

2011 Grants Awarded

ARDF is pleased to announce that its 2011 Alternatives Research Grant Program has made its selections. ARDF has awarded over \$150,000 to scientists developing alternative methods in a variety of areas of medical research, testing and education.

Congratulations to awardees:

Christopher H. Contag, PhD

STANFORD UNIVERSITY, STANFORD, CA

A Viable Human Tissue Model for the Development of Cancer Imaging Agents

John F. Eberth, PhD

UNIVERSITY OF HOUSTON, HOUSTON, TX

Physical Model of Hemodynamic Wave Propagation on Traumatic Brain Injury

L. Ray Whalen, DVM, PhD

COLORADO STATE UNIVERSITY, FORT COLLINS, CO

Support for the Virtual Canine Anatomy and Virtual Equine Anatomy Programs In Development at Colorado State University, College of Veterinary Medicine and Biomedical Sciences

Stuart K. Williams II, PhD

UNIVERSITY OF LOUISVILLE, LOUISVILLE, KY

Human Blood Vessel Mimics as In Vitro Aneurysm Models for Evaluation of Endovascular Devices

ARDF expresses its appreciation to the Institute for InVitro Sciences, Rodger Curren, PhD, President, for coordinating the review process, and thanks all applicants who submitted proposals and others for their interest in developing alternative methods of conducting high quality scientific research.

Innovation has its Awards
